A command-line interface can be accessed by using the Windows command line.

History AutoCAD Activation Code (originally AutoCAM) was developed by Christopher D. Lyon and released in 1988. In 1995, it was acquired by Autodesk and used as the basis for AutoCAD LT, which was released in 1996. AutoCAD LT was the first product based on AutoCAD. On April 7, 2018, Autodesk released AutoCAD 2019, replacing AutoCAD LT as the basis for AutoCAD. In February 2020, Autodesk released AutoCAD 2020.

Usage There are several ways for users to interact with AutoCAD: Enter data directly into the drawing's workspace using the pen and paper tools. Enter data into the drawing's workspace by typing or pasting data. Data can be imported from other applications using the Data Management tool or imported and exported using DXF (Drawing Exchange Format) files. The Autodesk Exchange Apps (Autodesk Exchange Platform) is a distribution channel for third-party AutoCAD plugins, most of which are open source. Import/export Importing and exporting data with DXF files allows for easy data exchange between applications. With the standard DXF import and export tools, users can import and export not only data from AutoCAD, but also from other AutoCAD users and products such as: Data from other AutoCAD product Data from a third-party application AutoCAD for Android AutoCAD for Android is an AutoCAD application available for free for the Android operating system. It allows users to draw, edit and annotate drawings using a stylus on screen. It runs on Android smartphones and tablets, and also offers features such as context-sensitive help, ability to import and export DXF files, and a WYSIWYG editor. The flag was designed by Commander (Retd.) S N Godbole, who in turn received the design from former Chief of the Air Staff Air Chief Marshal S P Tyagi. In the year 2013, the 12th Indian National Science Academy (INSA) conclave was held in New Delhi. The main programme had a debate on "Past, Present and Future of Science in India" which ended with a vote of thanks to the then prime minister Manmohan Singh. One of the speakers on the occasion was Air Chief Marshal P A K Herath who then brought the design and flag. The current Air Chief Marshal B K Joshi, who took over as the next chief of the air staff in November 2015, too had offered to bring this flag to the INSA conclave scheduled to be held in 2017. In March 2017, the then Prime Minister Narendra Modi discussed with his ministers on various issues of national security. He wanted to know how the air force, which provides aerial transport for all the ministers, would fly the national flag. Accordingly, the flag was designed by the Flag Officer Commanding-in-Chief of the Indian Air Force, Air Chief Marshal B K Joshi. The "Vande Mataram" or "I am the Nation" was included in the design as it is the motto of the Indian Air Force. A number of modifications were made to the old flag before it was adopted as the new air force flag. The national emblem, the national anthem, the national motto, the national bird, and the national animal all were designed by N K Arora. The flag is now being flown on all Air Force aircraft. The new national flag of India, was adopted on 26 October 2017.
