How to get travian bot to work? The bot is almost working fine. It is great for farming dinos, but bots in the gold club are stuck in town. How to get the bot working for gold club? I'd like to ask you to make it work. What do you guys use to get all your bot working? Im new to bots. Traian tactics bot uses a python script that is called osambot. Although any tool can be used to do it.

A: I tried to use Traian Tactics Bot for Traian 4.5 and it worked for me. But when I tried to use it for Traian 5 Kingdoms, it didn't work. I did noticed that the functionality for Traian 5.0 changed a little bit. It has another options for free gold club. You can make it easy for bot to earn free gold by the following steps:

- * Add some enemys to your game so that the bot can get kills.
- * Make sure that the bot has enough gold for that.
- * Invite the bot to your game and turn off the protection by the server.
- * Leave the bot undisturbed, it will earn for you free gold.

In my tests the bot was paying enough for 3~4 dinos to be killed, in general the free gold club has 12+1 for everything. I also tried to use a python script made by Petar Mankov that worked very well and fast. I used a bot that was made for traian 5.0 and it was very easy to use. I think that I can put a video here but, it is still in the works. I will put an update here when I have it ready. If you don't see the video below, it was deleted from this site.

A: I think the easiest way is to use a mod from a mod repository such as this. I did a quick search, and this should work with the latest updates of the mod:

Q: create Multi tab using Javascript I am facing a problem while create multi tab using javascript. please help me to resolve the issue. My test.html file has below snippet
