After our last review of 'PC Format Magazine' (PCMag.com), it occurred to us that we could once again collaborate with our good friends at PCFormat. With the magazine's release of its July 2006 issue, I spent a great deal of time considering the best Windows applications of the year. In addition to the innovation and excellence in software that is presented in the magazine, it seemed appropriate that PCF also share the list of Top 10 PC Picks for the software they believe to be the best of the year. PC Format's Staff Pick: PC Format included ONEforge (previously reviewed here) in their list of Top 10 PC Picks. From a full-screen view, the interface of the application is clean and inviting. You can use the mouse wheel to zoom in and out and select the parts that interest you. Also, you can collapse multiple points on the user interface by clicking on the title bar of the mouse, though you'll only be able to select the parts you've collapsed. For that reason, using the tool is easier because you don't need to use the mouse to click on every part, which is also where the "keyboard" view comes in handy. However, this feature is a major disadvantage, because you can't use it without a keyboard. Oneforge is a useful tool for 2D drawing, and it includes both a built-in bitmap editor and a vector graphics editor. You can easily save your drawings, and make them compatible with a wide range of Windows and Mac. You can convert bitmap drawings to a wide array of file types, including EPS, SVG, PNG, GIF, BMP and TGA. Oneforge supports layers, and you can use the Undo and redo features of a drawing canvas. Furthermore, you can export your drawings to JPEG, BMP, PNG or EMF files. Oneforge supports both bitmap and vector graphics and provides many functions and tricks. As such, this program is easy to use. If you need to resize a document, for example, you can change the resolution by clicking on a grid in the program, dragging the squares, and dropping the new size. Version 2.6 - 6/23/2006 - Updated for Onefal 2.5. - Updated to the latest version of the Onefal file format. - Some configurable configurations, such as drawing grids. - Major bug fixes. - Minor cosmetic fixes. SearsNew president of the Australian Marine Conservation Society The Australian Marine Conservation Society (AMCS) is one of the leading non-government environmental organisations in Australia. It was first established in 1973 by a group of university researchers, environmentalists and technicians, concerned that a strong environmentalist presence was lacking from the new Australian political scene. Since then, it has grown into a respected organisation of over 14,000 members, and is recognised as an important influence on environmental policy. AMCS is unique in its ability to bring together diverse interest groups and political parties. It has over 50 active Council members, but it is a small and supportive umbrella organisation. In 2011, AMCS moved to new premises at Kangaroo Point, Kippa-Ring, Brisbane, Queensland. In the first years of its existence, AMCS was granted exemption under the Electoral Act (Qld) from both a financial disclosure declaration and legal obligation to publish advertisements to maximise audience.
