Roblox is a free, fun, and massively multiplayer online game, where over 350 million people around the world are making their own games or playing pre-made games created by other people, and it's all powered by Roblox. Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company. The username and password would then be entered into the chat room the creator wanted to make. A chat room was a community of friends in which a creator could talk to other people and play games with them. Roblox's first game creation function allowed the creation of a "Bloxel." This was a block-based game which could be

played within a browser or downloaded and played offline. The Bloxel creator had the freedom to design and create the game. It also made the game available to other people to play. The game creator could create as many Bloxels as he or she wanted, and the game could be played by multiple people at the same time. After Roblox's launch in 2006, Roblox took advantage of the growing number of users by merging the chat room and the Bloxel creator into one. With
